

Do I need the prerequisite courses?

Metro Continuing Education - 2025-05-16 - High School & Upgrading

If you are under 19 years of age as of September 1 of the current year, and do not have your Alberta High School diploma, yes, you need to have the required pre-requisites in order to take a course.

If you are a [mature student](#), you are not required to have the pre-requisites in order to take a course. Courses build upon themselves so it will always be helpful to have the pre-requisite courses but it is not necessary. We encourage everyone to review the curriculum of the pre-requisite courses before beginning a new course. You can find the program of study for [all high school courses here](#).
